TiBOOST Innovation Growth Program – Partner Brief

The **TiBOOST Innovation Growth Program** is an international start-up competition initiated by Taiwan's **Financial Supervisory Commission (FSC)** and **National Development Council (NDC)**, and implemented by the **Taiwan Venture Capital Association (TVCA)** and the **Taiwan Private Equity Association (TPEA)**.

The programme is part of Taiwan's broader efforts to strengthen connections between its internationally recognised technology ecosystem and capital market. It is designed to identify high-potential AI and technology companies from Taiwan and overseas, while creating opportunities for them to engage with investors, industry leaders and Taiwan's capital-market ecosystem, including the **Taiwan Innovation Board (tib)**.

Who We Are Looking For

TiBOOST welcomes legally incorporated start-ups from Taiwan and overseas, particularly companies working in areas related to Taiwan's **Ten Major AI Infrastructure Projects**.

Applicants should have:

- completed at least one round of external funding; or
- achieved initial market validation.

Companies that have already been listed on the Taiwan Innovation Board are not eligible to participate. Additional eligibility requirements, including shareholding and control restrictions relating to Mainland China, are detailed in the official programme guidelines.

Why International Start-ups Should Apply

TiBOOST offers overseas companies an opportunity to gain direct exposure to Taiwan's technology, investment and capital-market ecosystem.

Companies that advance to the **Final Round on 10 November 2026** will be invited to pitch in person before a professional judging panel and engage with investors, industry leaders and other key ecosystem stakeholders in Taiwan.

To make participation more accessible for overseas teams, **companies incorporated outside Taiwan may apply for up to US\$1,500 per company towards round-trip airfare and accommodation expenses**, regardless of the nationality of the team member presenting at the Final Round.

The travel itinerary must include **10 November 2026**, and reimbursement will be subject to the submission of relevant supporting documents, including flight and accommodation records.

For companies incorporated in Taiwan that advance to the Final Round, eligible teams may apply for reimbursement of round-trip Taiwan High Speed Rail fares and accommodation expenses, up to **US\$200 per company**.

Prize Pool and Opportunities

A total of **NT\$5 million** in prize money will be awarded:

- **First Prize:** NT\$2.5 million
- **Second Prize:** NT\$1.5 million
- **Third Prize:** NT\$1 million

Participants may also gain access to additional ecosystem resources, including start-up hub opportunities, media exposure and connections with Taiwan's investment and innovation community.

How Partners Can Support

We would greatly appreciate your support in sharing this opportunity with **AI and technology start-ups within your network**, particularly companies that are already demonstrating market traction or have raised external funding and are interested in expanding their presence in Asia.

The programme is open to international applicants, and we particularly hope to introduce more promising overseas companies to Taiwan's technology and capital-market ecosystem through TiBOOST.

Please feel free to share the programme through your **social media channels, newsletters, start-up communities, portfolio networks or other relevant platforms**.
