Chao-tsung Hsu Yearly Abundance / ceramics

Acclaimed ceramic artisan Chao-tsung Hsu was born in 1954 in Yilan County. He is the first among the global Chinese community to be invited to create ceramics at the Meissen Factory in Germany. He pioneered the unique technique of "iron embroidery" glaze, integrating it with gold-painted orchids and fish playing in water motifs on a treasure vase. This symbolizes the wish for abundance every year. Currently, this artwork is in the collection of the National Taiwan Craft Research and Development Institute.
